

PMP®/CAPM® Exam Preparation

A Mastery Experience Workshop™

How You Will Benefit

- Learn what you need to pass the PMP®/CAPM® exam. Guaranteed!
- *Experience* the PMBOK®.
- Leave with tools, templates and examples to use on your future projects.

Topics Covered

PMI® Specific Terminology

- Learn how PMI® defines and approaches project management.

The Five Project Management Process Groups

- Understand initiating, planning, executing, monitoring and controlling, and closing processes within project management.
- Understand the inputs, tools, techniques, and outputs of each project management process.

The Nine Project Management Knowledge Areas

- Learn about integration, scope, time, cost, quality, human resource, communications, risk, and procurement.

Test Preparation Skills

- Receive tips, tricks & help on how to apply, prepare for, and take the PMP®/CAPM® exam.

Who Should Attend

- Anyone wanting to pass the PMP®/CAPM® exam and become certified.

Materials Provided

- PMBOK (current version)
- Participant Manual and Prep Study Guide
- Accelerated Learning Aids (flashcards, practice tests, word games, etc.)
- PMP Prep iPad Application

Workshop Description

During this 5-day, hands-on, interactive workshop, participants will learn all they need to know to pass the PMP®/CAPM® exam—guaranteed.

Through the use of our iPad® simulation participants find themselves immersed in the project management situations they will find on the exam. Because participants actually *experience* the PMBOK®, they leave with the knowledge, tools, and techniques to pass the new situational exam and improve the performance of their future projects.

Arthur Maxwell's PMP®/CAPM® Exam Preparation workshop breathes life into the PMBOK® and your certification journey.

Learning Methods

- Experienced PMP® instructors express concepts, tools and techniques; and facilitate group discussion.
- An iPad®-based simulation deepens learning by immersing participants in dozens of project management situations relevant to both the exam and real-life project management. The simulation provides a rich multi-media experience designed to increase the levels of learning and give participants an experience to build on.
- Working in teams, participants put project management concepts, tools and techniques to use through practical exercises within the context of the simulation.
- Practice questions, flashcards, and additional study aids to accelerate learning.
